

RAJUL MISHRA

ML Engineer | Full Stack Developer | Generative AI

mrajul1234@gmail.com | 9368069761 | Ramnath Colony, Budaun, Uttar Pradesh

GitHub | LinkedIn | LeetCode

Professional Summary

B.Tech Computer Science (IoT) student with 9.31 CGPA and hands-on experience in Machine Learning, Full Stack Development, and Generative AI applications. Skilled in building AI-powered systems, scalable REST APIs, and responsive web applications using Python, Next.js, PostgreSQL, and JavaScript technologies. Developed projects involving LLM-based resume analysis, computer vision, and CRM-based Progressive Web Applications. Strong foundation in Data Structures, DBMS, Operating Systems, and Computer Networks with practical experience through internships, hackathons, and IEEE research publication.

Education

SRM Institute of Science and Technology, Ramapuram | **B.Tech CSE-IoT** **2022 – 2026**
CGPA: 9.31 / 10

Technical Skills

Programming Languages	Python, Java, JavaScript, SQL
Machine Learning & AI	Scikit-learn, Pandas, NumPy, OpenCV, YOLOv4-Tiny, Generative AI, LLM Applications, Prompt Engineering
Frontend Development	React.js, Next.js, Tailwind CSS, TypeScript, Framer Motion
Backend Development	Node.js, Express.js, REST APIs, PostgreSQL, SQLite, Supabase
Cloud & Tools	Git, GitHub, Oracle Cloud Infrastructure (OCI), Vercel, Postman, Streamlit
Core Computer Science	Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Experience

Deloitte | **ServiceNow Intern** **Jan 2026 – Present**
Remote | Enterprise Workflow Automation

- Designed and optimized ServiceNow workflows for enterprise-scale automation systems.
- Automated backend operational processes improving workflow efficiency and reliability.
- Collaborated with internal teams to streamline issue resolution and system operations.

SHAMGAR SOFTWARE SOLUTION | **Machine Learning Intern** **Feb 2025 – May 2025**
Remote | ML Development

- Processed and structured datasets for machine learning model development pipelines.
- Assisted in preprocessing, feature engineering, and analytical workflow optimization.
- Worked with Python-based ML operations and data validation techniques.

Extended Leafs Inc | **Full Stack Development Intern - AI & VR Integration** **Jan 2025 – Feb 2025**
Remote | Full Stack Development

- Developed scalable backend APIs and frontend modules for AI-integrated applications.
- Built responsive full-stack components using JavaScript technologies and REST architecture.
- Contributed to frontend optimization and backend feature integration workflows.

Projects

TalentLens - AI Resume Ranking System | **Python, Streamlit, Groq API, SQLite, PyMuPDF** **2026**

Live Demo | GitHub Repository

- Built an LLM-powered resume ranking system using Llama 3 and Groq API for automated candidate evaluation workflows.
- Implemented semantic resume analysis, document ingestion, and structured scoring pipelines.
- Designed AI-driven response generation workflows using Python and Streamlit architecture.

Live Demo | GitHub Repository

- Engineered a production-ready gym CRM Progressive Web App with attendance, membership, and analytics management systems.
- Built responsive dashboards, secure backend integrations, and real-time operational workflows.
- Optimized application performance for seamless mobile-first user experience.

Real-Time Object Detection System | Python, OpenCV, YOLOv4-Tiny

2023

GitHub Repository

- Developed a real-time object detection application using YOLOv4-Tiny and OpenCV DNN.
- Achieved optimized low-latency inference for real-time computer vision workflows.
- Implemented image processing and object recognition pipelines for detection tasks.

Certifications

• Oracle Cloud Infrastructure 2025 Certified Foundations Associate	Oracle University	Sep 2025
• AI/ML for Geodata Analysis	Indian Institute of Remote Sensing (IIRS), ISRO	Sep 2024
• Intro to AI: A Beginner's Guide to Artificial Intelligence	Udemy / 365 Careers	Jan 2026
• Communicating Insights with Data Visualization: Fundamentals	Udemy	Jan 2026

Research Publication

- **Real-Time Smart Meeting Assistant Using Edge AI for Audio Capture, Speech-to-Text Conversion, and Meeting Scheduling**
Published research paper in IEEE Xplore Digital Library focused on Edge AI, speech recognition, intelligent meeting automation, and real-time audio processing systems.
Research Areas: Edge AI, Speech-to-Text Systems, Audio Processing, Intelligent Scheduling, Smart Automation
IEEE Xplore Publication Link

Achievements, Hackathons & Competitions

- **Flipkart GRiD 7.0 National Semi-Finalist** Qualified among top teams nationwide in Flipkart's flagship Software Development competition. Aug 2025
- **Smart India Hackathon Semi-Finalist** Developed Remote AQI Sensor Monitoring solution for environmental analytics and IoT-based monitoring. Oct 2024
- **APPIZAP Hackathon Runner-Up** Built application integrating social networking and educational resource sharing systems. Sep 2024
- **Innovation Quest Finalist** Finalist in university-level innovation ideathon focused on scalable technology solutions. Apr 2024
- **ABINITO 23 Winner** Secured Winner position in Data Analytics competition using insight-driven analytical solutions. Sep 2023

Technical Highlights

- Built AI-powered applications using Python, LLM APIs, REST architecture, and scalable full-stack technologies.
- Hands-on experience in Machine Learning, Computer Vision, Generative AI applications, and responsive web development.
- Experienced in developing Progressive Web Applications (PWA), backend APIs, and AI-integrated systems.
- Strong problem-solving and analytical skills demonstrated through hackathons, internships, and IEEE research publication experience.
